PROJECTS

BookHaven | MERN Stack

- Developed a full-stack bookstore application designed to provide users with a seamless browsing experience. The project aimed to create an intuitive and efficient online platform for discovering and accessing books.
- Implemented secure user authentication with login, logout, and signup functionality using bcryptjs for password hashing.
- Designed and developed a responsive user interface with React and TailwindCSS, ensuring a smooth user experience across devices.
- Utilized MongoDB and Mongoose for data storage and schema management, allowing the storage of numerous books in the backend.
- Integrated React Hook Form for efficient form handling and validation, improving user interaction.
- Implemented React Router DOM for seamless navigation between different components of the application.
- Enabled premium content access for logged-in users, allowing them to read premium books.
- Utilized React Hot Toast for real-time feedback and notifications to enhance user experience.

Portfolio Website | HTML, CSS, JavaScript

- The website serves as an interactive platform to explore my work and capabilities.
- Developed interactive sections such as project showcases and contact form using JavaScript, enhancing user engagement and interactivity.
- Regularly updated and maintained the website to reflect current projects, skills, and achievements, ensuring relevance and accuracy.
